

# Smart GSM NMS

## Smart Network Management System

### Smart GSM NMS Overview

The screenshot displays two windows from the Smart GSM NMS. The top window, titled 'Status Information - IPNext 3000 Master', shows system status information including Today's Availability, CPU Utilization (95%), Memory Utilization (57%), and Storage Utilization (Total: 1024 GB, Used: 686.3 MB, Free: 337.7 MB). The bottom window, titled 'Status Information - GS3000 gateway', shows a table of Device Call History with columns for ID, Create Time, Duration, Caller Type, Caller Number, Called Type, Called Number, Remote IP, GSM Phone N., Codec, and Status.

ID	Create Time	Duration	Caller Type	Caller Number	Called Type	Called Number	Remote IP	GSM Phone N.	Codec	Status
346	11/18/2010 3:54:50 PM	00:00:00	FXS	7000	Unknown	9999	172.16.9.18		g711alaw	Failed

## **NMS Server**

- OS : RHEL (Redhat Enterprise Linux) 5.0 or higher
- CPU : Quad-Core 2.0 GHz / 1333MHz FSB 2x4 MB cache
- Physical Memory : 4 GB
- HDD : 300 G
- JRE (Java Runtime Environment) 1.5.1 or Higher
- Database : PostgreSQL 8.1.11

## **NMS Client**

- Windows XP, Vista, Windows Server 2000/2003
- Microsoft Internet Explorer 6.0 or higher

# NMS Networking Diagram

# Web-based Management

- **Easy Access via Web browser**
  - Microsoft Internet Explorer 6.0 or higher compatible
- **Version Control**
  - Automatic version check
  - New version software download feature
- **UI control**
  - User friendly GUI management

# Version Control

The screenshot displays a Windows Internet Explorer browser window titled "Smart Network Management System - Windows Internet Explorer" with the address bar showing "http://172.16.31.20/". The main content area features a dark blue background with a world map, server icons, and a person at a laptop. The text "AddPac Technology Network Management System for GSM" is prominently displayed. Two dialog boxes are overlaid on the browser window:

- Launching Application:** A blue dialog box with a close button. It contains a progress bar and the text: "Verifying application requirements. This may take a few moments."
- (61%) Downloading installnms:** A blue dialog box with a close button. It contains a progress bar and the text: "Downloading installnms. This may take several minutes. You can use your computer to do other tasks during the installation." Below the progress bar, it shows: "Name: installnms", "From: 172.16.31.20", and "Downloading: 6.29 MB of 10.1 MB". A "Cancel" button is at the bottom.

Two yellow callout boxes with arrows point to specific elements:

- Automatic version check:** Points to the "Launching Application" dialog box.
- New S/W version update:** Points to the "(61%) Downloading installnms" dialog box.

The browser's status bar at the bottom shows "Done", "Trusted sites", and "100%" zoom level.

# Web-based Login

# Network Resource Management

- Network resource management with hierarchical structure
- Role-based resource management for each administrator

The screenshot displays the AddPac Network Resource Management interface. On the left, a hierarchical tree structure shows the organization of network resources, including sites like 'AddPac' and 'Seoul', and various sub-networks and branches. A context menu is open over the tree, with 'Execute SMM' highlighted. In the center, a table lists device categories such as Desktop, Network Camera, Phone, Server, Switch, and VoIP Gateway. On the right, a 'User Properties' dialog box is open, showing a selection of site nodes for assignment to a user. Three orange callout boxes provide additional context: one points to the tree structure, another to the 'Execute SMM' menu item, and a third to the 'User Properties' dialog.

manage the complex network with a structured, hierarchical form

can assign the hierarchical node to the operator and manage role-based policy

can cooperate with the application executables such as SMM

# Device Fault Management

# Device Fault Management

The screenshot displays the Smart NMS interface within a Windows Internet Explorer browser window. The address bar shows the URL `http://172.16.31.20/smartnms.htm`. The interface features a top navigation bar with tabs for NMS, Account, Configuration, Monitoring, Notification, Fault, Statistics, View, and Help. Below this is a toolbar with various icons for site management, monitoring, and reporting.

The main content area is divided into several sections:

- Left Panel:** A tree view showing the hierarchy of sites and subnets, including AddPac, Seoul, and MokDong Area.
- Top Right:** A control panel with a 'Group Type' dropdown set to 'Site', a 'Value' dropdown set to '<All>', and 'View Mode' options for 'Large' and 'Small'. There are also 'Refresh', 'Import', and 'New Tab' buttons.
- Center:** A grid of device status icons. Each icon represents a device with a status indicator (green for OK, red for fault, yellow for warning). A red arrow points to a specific device icon labeled 'NMS Camera' with IP address '172.16.253.118'. A text box with an orange background contains the text: "device status matrix with small view mode".
- Bottom:** A table titled 'Your Outstanding Notices (18)' listing various alerts with columns for Ack, ID, Send Time, Site, Device Name, IP Address, Service, and Message. The messages describe service outages and interface failures for various devices.

The status bar at the bottom of the browser window shows the date and time as '4/13/2009 3:14:58 PM', the IP address '172.16.31.20:5101', the user 'admin', and the version 'Version 1.2.3384'.

# Device Fault History Management

- Provide both summary view and detailed event message
- Can Write troubleshooting job note for each event manually
- Administrator can query for a history fault with search condition
- Each fault is related to the several raw events

# Device Fault History Management

daily fault event summary statistics information

detail fault event history list up with filter condition (advanced search)

The screenshot displays the Smart Network Management System (NMS) interface. The main window shows a 'Notification Summary' table on the left and a detailed fault event history table on the right. An 'Advanced Search' dialog box is open, allowing users to filter fault events based on various criteria.

# Device Fault History Management

The screenshot displays the Smart Network Management System (NMS) interface. The main window shows a table of device fault history with columns for Ack, ID, Send Time, Site, Device Name, IP Address, Service, Message, Responder, and Respond Time. Two pop-up windows are visible: 'Troubleshooting Note' and 'Troubleshooting Note (Event ID : 45393)'. An orange callout box points to the 'Troubleshooting Note' window with the text 'Can write troubleshooting note if needed'.

**Event Detail (ID: 45412)**

Event Time: 4/10/2009 9:26:04 PM | IP Address: [ ] | Severity: **Critical**

Site: /AddPac/Branch GX | Device Name: 00\_RBT\_server | Device Model: AP-RBT1000

Service: [ ] | Status: [ ] | Acknowledged By: [ ]

Log Message: device 00\_RBT\_server down

Description: device 00\_RBT\_server's all interface down. A new Outage record has been created and service level availability calculations will be impacted until this outage is resolved.

# Device Event History

The screenshot displays the Smart Network Management System (NMS) interface within a Windows Internet Explorer browser. The interface is divided into several sections:

- Event Summary Table:** A table on the left provides a high-level overview of events, including columns for Event Time, Outsta., Ackno., Not Clea., Cleared, and In Pr.
- Main Event List:** A central table lists individual events with columns for ID, Severity, Event Time, Site, Device Name, IP Address, Service, and Message. An orange callout box with an arrow pointing to the search bar above this table states: "Can view all events for devices with search condition".
- Summary Callout:** An orange callout box with an arrow pointing to the 'Event Summary' table states: "summarize daily event statistics data".
- Search and Filter Options:** Above the main event list, there are buttons for "Limit", "Refresh", "Advanced Search", "Acknowledge Events", and "Troubleshooting Note".
- Results:** At the bottom, it shows "Results: 1 to 20 of 25346" and "Search Constraints: user=admin".

# Device Status Information

- System Performance Information (CPU, HDD, Memory,...)
- Provide device current service status (up/down)
- Provide device main status (max value vs current value)
- Provide network interface status (up/down & network traffic)
- Provide VoIP interface status and call statistics.
- Search call history for the device and port
- Display Graph Series with System Performance Information
- Monitor Main Status Flow with System Monitoring View

# System Status Information

# Network Interface

The screenshot shows a web-based interface for a GS3000 gateway. The title bar reads "Status Information - GS3000 gateway". Below the title bar are several tabs: "System Status Information", "Network Interface", "VoIP Interface", "Call History", "Performance History", and "Performance Monitoring". The "Network Interface" tab is selected. The main content area is titled "Interface Status" and contains a table with the following data:

Index	Name	IP Address	Speed	Status	Rx Traffic	Tx Traffic	Errors (pkts)
2	FastEthernet0/0	172.16.9.120	100Mbps	● up	10.7Kbps	2.1Kbps	0
3	FastEthernet0/1	192.168.10.1	100Mbps	● down	0 bps	0 bps	0

# VoIP Interface

You can view call summary informations such as total call, ASR, and ACD for the GSM gateway device each

The screenshot displays the 'Status Information - GS3000 gateway' web interface. The 'VoIP Interface' tab is selected, showing 'GSM Call Statistics' and 'VoIP Interfaces Status'.

**GSM Call Statistics**

Inbound Calls				Total			All Clear

# Performance History

performance analysis graph for last 24 hours

# Performance Monitoring

performance monitoring  
with proper time interval

# Notification Management

- Notify administrator for important event such as critical device fault when proper action needs
- Provide several notification channel such as SMS, e-mail, alarm lamp
- Notification channel configuration for each event
- Manage notification with device category such as Server, Terminal, PC, etc
- Provide Alarm with audible (play sound), visible (alarm lamp) form

# Event Notification Management

**apply notification policy with event-based filter (example : notify me when network link of device is downed through SMS, e-mail)**

**specify category when each event occurs**

**describe notification message content for e-mail or SMS**

**Smart Network Management System - Windows Internet Explorer**

# Event Notification Management

The screenshot displays the Smart Network Management System (NMS) interface. The main window shows a tree view of 'Current Outage Devices' and a 'Destination Paths' section. A 'Destination Path Properties' dialog box is open, showing configuration options for a destination path named 'default'. The 'Initial Target' section contains a table with the following data:

Notification Type	Target	Auto Notify
alarmLamp	alarmLamp	on
email	admin	on
sms	admin	on

An orange callout box with a red arrow points to the 'alarmLamp' row, containing the text: "define notification channel such as e-mail, sms, or alarmlamp". Below the table are 'Add' and 'Delete' buttons. The 'Escalation' section is currently empty. The bottom of the interface shows a list of 'Your Outstanding Notices' with columns for Ack, ID, Send Time, Site, Device Name, IP Address, Service, and Message.

# Fault Statistics

- analyze for a fault event with graph and detailed list data
- Report form generation and print out for statistics result

# Fault Statistics

The screenshot displays the Smart Network Management System (NMS) interface. The top navigation bar includes 'NMS', 'Account', 'Configuration', 'Monitoring', 'Notification', 'Fault', 'Statistics', 'View', and 'Help'. The main content area is divided into several sections:

- Event Summary Table:** A table on the left showing event statistics for various dates from 2009-04-04 to 2009-04-13. Columns include 'Event Time', 'Outsta...', 'Ackno...', 'Not Clea...', 'Cleared', and 'In Pr'. The data shows a significant spike in faults on 2009-04-06 (1453) and 2009-04-05 (1704).
- Search Condition Panel:** A panel above the chart allowing users to filter data by 'Hour' (set to 4/ 9/2009) and 'Site' (set to Branch A, Branch AQ, B).
- Fault Statistics (Site) Chart:** A bar chart showing the number of faults per hour for the selected date and sites. The x-axis represents 'Time' from 01:00 to 23:00, and the y-axis represents 'Fault Count' from 0 to 60. The chart shows a peak in fault counts around 15:00.
- Detailed Data Table:** A table below the chart showing fault counts for each hour on 4/9/2009, broken down by site. The total fault count for the day is 118.
- Your Outstanding Notices (18):** A list of active notices at the bottom of the interface, including details like 'Ack ID', 'Send Time', 'Site', 'Device Name', 'IP Address', 'Service', and 'Message'.

Two orange callout boxes provide additional context:

- display graph for fault statistics with various search condition:** Points to the search condition panel and the bar chart.
- display detailed data for fault statistics:** Points to the detailed data table.

# Fault Statistics – Report Generation

report generation for fault statistics and print out the result

# Call Statistics

- SmartNMS receives CDR data for calls which is used for call statistics from the VOIP or GSM gateway.
- You can get statistics data with various time interval conditions such as daily and monthly basis for the device and VOIP port.
- Report statistics can be exported to the various document formats such as PDF and MS-Excel.

# Call Statistics

# Call Statistics

# Call Statistics

# Model & Service Management

- Define new model with provided template image & properties
- Customize data collection with standard protocol such as TCP, SNMP

# Device Model Management

The screenshot displays the Smart Network Management System (NMS) interface. The main window shows a tree view of sites on the left and a table of device models in the center. A 'Device Model Properties' dialog box is open, showing details for the 'AP-IPC250M' model, including its category ('Network Camera') and a 'Model Image' field. A 'Model Image Management' window is also visible, showing a grid of device images for selection. An orange callout box points to the 'Model Image' field in the dialog box, and another orange callout box points to the 'Model Image Management' window.

manage device model with various properties such as model image

model image repository for selection
