MGCP	7.00	15. July. 2003

## MGCP protocol is added

From APOS version 7.00, all models of AddPac gateway support MGCP protocol. The MGCP protocol is based on IETF RFC2705bis-02 and can be running concurrently with H.323 and SIP protocol.

When a dial peer of a voice port is assigned to MGCP by below command, inbound call from the voice port is handled by MGCP protocol with call agent. In case of inbound call from VoIP to a certain voice port, the voice port can handle any kind of protocol among H.323, SIP and MGCP.

AddPac MGCP supports redundant (i.e., secondary) call agent for providing seamless service whenever the primary call agent is in service or not.

Also, AddPac MGCP supports T.38 fax relay and DTMF relay by RFC2833.

### - Related Commands

```

AP2520(config)# dial-p voice 0 pots
AP2520(config-dialpeer-pots-0)# application ?
mgcpapp    set MGCP Application
AP2520(config-dialpeer-pots-0)# application mgcpapp
AP2520(config-dialpeer-pots-0)# port 0/0      ←port 0/0 is assigned to MGCP
AP2520(config-dialpeer-pots-0)# exit
AP2520(config)# mgcp
AP2520(config-mgcp)# ?
no          set to default configuration
register    Enable MGCP
call-agent   Specify address of call-agent
default-package Select the Default Package Capability
dtmf-relay   Configure mgcp dtmf-realy
restart-delay Specify the Restart Delay timer value
timeout     Set timeout value
end         Go to Top menu
exit        Exit from the EXEC
AP2520(config-mgcp)# call-agent ?

```

```
alias      set Hostname or IP address of the call-agent
AP2520(config-mgcp)# call-agent ca1.addpac.com ?
<0-65536>    port number (default 2427)
<cr>
AP2520(config-mgcp)# call-agent ca1.addpac.com
AP2520(config-mgcp)# call-agent ca2.addpac.com ?
<0-65536>    port number (default 2427)
<cr>
AP2520(config-mgcp)# call-agent ca2.addpac.com 2427 ?
<0-254>    priority (default 128)
<cr>
AP2520(config-mgcp)# call-agent ca2.addpac.com 2427 130
←set secondary call agent
```

```
AP2520(config-mgcp)# default-package ?
as-package   Select the Announcement Server Package
dtmf-package Select the DTMF Package
gm-package   Select the Generic Media Package
hs-package   Select the Handset Package
line-package  Select the Line Package
trunk-package Select the Trunk Package
AP2520(config-mgcp)# default-package line
AP2520(config-mgcp)# dtmf-relay ?
rtp-2833     DTMF relay by RTP payload defined by RFC 2833
←set DTMF relay to RFC2833
```

```
AP2520(config-mgcp)# dtmf-relay rtp
AP2520(config-mgcp)# restart ?
<0 - 500>    Select the Restart Delay timer value (sec)
AP2520(config-mgcp)# restart 60
AP2520(config-mgcp)# timeout ?
tretry    set MGCP retry timeout value (sec)
thist     set MGCP hist timeout value (sec)
tmax      set MGCP max timeout value (sec)
AP2520(config-mgcp)# timeout tretry ?
<1 - 30>    Timeout value (sec)
AP2520(config-mgcp)# timeout tretry 3
```

```
AP2520(config-mgcp)# timeout thist ?  
<4 - 3600>           Timeout value (sec)  
AP2520(config-mgcp)# timeout thist 8  
AP2520(config-mgcp)# timeout tmax ?  
<4 - 3600>           Timeout value (sec)  
AP2520(config-mgcp)# timeout tmax 8
```

```
AP2520(config)# show mgcp
```

#### Call Agent Registration Information

Call-agent registration status :

Call-agent list :

ca1.addpac.com	2427	priority(128)
ca2.addpac.com	2427	priority(130)

#### MGCP Timer values

tretry (mgcp retry timer) = 3 sec.

thist (mgcp hist timer) = 30 sec.

tmax (mgcp max timer) = 8 sec.

#### MGCP Information

DTMF Relay = rtp-2833

restart delay = 60 sec.

default-package = line-package

- **Default value**

The default values and features are described as bellows,

- Timeout restart : 5 sec
- Timeout tretry : 4 sec
- Timeout thist : 30 sec
- Timeout tmax : 20 sec
- DTMF relay : inband
- T.38 : enabled with 9600 bps
